Experience

UI Developer

iProtecs Solutions Private Ltd   *2023 - **Present***

- As a UI Developer at iProtecs Solutions Private Ltd, I have been instrumental in crafting intuitive and visually appealing user interfaces.
- Leveraging my expertise in front-end development technologies, I collaborate closely with cross-functional teams to translate design concepts into pixel-perfect interfaces that enhance user experience.
- I've contributed to the development of responsive web applications, ensuring seamless functionality across various devices.

Projects

Detacloud

Next Js | Material UI   *2023 - **Present***

- Within the virtual machine website project, users are empowered to create virtual machines seamlessly, while also having the capability to incorporate additional storage options tailored to their specific needs.
- Leveraging the power of Next.js and Material-UI (MUI), the website offers an intuitive and responsive user interface, ensuring a smooth user experience throughout.
- Furthermore, the deployment of the website on an Nginx server underscores its scalability and robustness in handling diverse user interactions and demands.

Whatsapp Clone

React Native | Next Js | Socket.io   *Sep - 2023*

- This project showcases my skills in mobile app development with React Native, as well as my ability to create intuitive user interfaces and deliver robust and performant applications.I have created this project using react-native.
- Implemented real-time messaging functionality using socket.io, enabling users to send and receive messages instantly.

Ecommerce

Next Js | Node Js | MongoDB | Express Js | Redux   *Aug - 2023*

- As part of my web development journey, I undertook the ambitious task of creating a feature-rich eCommerce website using Next.js, a powerful and cutting-edge React framework. This project allowed me to showcase my skills in front-end development, user interface design, and state management while leveraging the benefits of server-side rendering (SSR) and SEO optimization offered by Next.js.
- Shopping Cart and Checkout: Developed a smooth shopping cart system that enables users to add products, review their selections, and proceed to a secure checkout process.
